TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Java, CSS, HTML, Node.js, C++

Technologies: React, React Native, .NET, GraphQL, REST APIs, Microservices

Developer Tools: Git, GitHub, Docker, Postman, GitHub Copilot, SonarQube, AIDA Studio, MCP, Azure, Jenkins, Cypress, Selenium

EXPERIENCE

Dayforce, Inc.

Toronto, Canada

Software Developer II

Nov 2024 - Present

- Delivered full-stack features for **Payroll Next Gen ROE and Auto Adjust for UPS Canada**, helping support Dayforce's largest enterprise customer population of **700K+ employees** and a high-value account representing **\$10.8M in annual revenue** and **\$7.7M in one-time fees**.
- Developed and stabilized payroll features across **React, TypeScript, C#, .NET, GraphQL, REST APIs, SQL, and microservices**, supporting approximately **15,000 Canadian employees** and enabling compliance-critical Canadian payroll functionality in Next Gen.
- Contributed to closing a major feature parity gap between Classic Payroll and Payroll Next Gen by delivering federally mandated **ROE functionality**, unblocking Canadian customer migration and reducing compliance and operational risk.
- Validated ROE at enterprise scale by testing **4,000 ROE records within a 21,000-employee pay run** while maintaining stable payroll calculation and commit performance.
- Owned feature delivery from implementation through testing, bug investigation, QA collaboration, and post-release stabilization for customer-critical **ROE and Auto Adjust** workflows.

PAR Technology

Toronto, Canada

API Software Engineer

May 2024 - Nov 2024

- Built a full-stack feature flag management platform using **React, C#, .NET, and LaunchDarkly APIs**, enabling teams to self-serve feature flag operations and reducing manual engineering support.
- Developed backend APIs and maintained legacy **C#, .NET** services, improving release control, operational visibility, and application reliability.
- Produced technical impact analyses and QA documentation to streamline test planning, release validation, and long-term maintainability.

PAR Technology

Toronto, Canada

Associate QE Automation Engineer (Co-op, Part-time)

May 2023 - April 2024

- Improved Selenium C# automation suite pass rate from **50% to 100%** by stabilizing scripts, fixing flaky tests, and improving test logic.
- Automated **100+ web and POS test cases** using **Selenium C#, TestComplete JavaScript, AWS EC2, and Jenkins pipelines**.
- Investigated production defects, collaborated with QA/QE engineers on release validation, and mentored a co-op student on automation testing practices.

PROJECTS

Melanie's Portfolio (GitHub) — A responsive personal portfolio using **Next.js, React, TypeScript, Tailwind CSS, and Vercel** to showcase projects, skills, and experience.

Today's Weather (GitHub) — A **React** weather app using the **OpenWeatherMap API, geolocation, React-Bootstrap, and local state caching** to display real-time weather by city or current location.

EDUCATION

Seneca Polytechnic

Toronto, Canada

Honours Bachelor of Technology - Software Development | GPA: 4.0/4.0

January 2021 - August 2024
